The current and future utility market

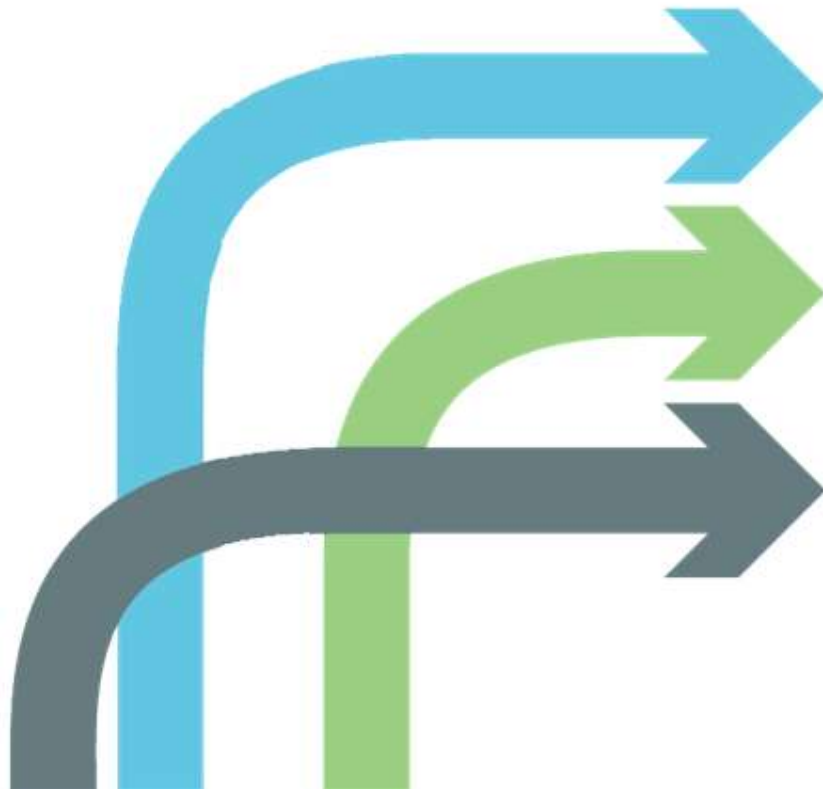

Let's Answer The Big Questions

**Why do we have the
challenge of huge
cost increases?**

**How do we navigate
to a better position &
what options are
available?**

What's happened to date?

01 Energy crisis rationale

02 Future risk outlook

03 Survey results analysis

Wholesale market

Take charge of
your energy
strategy

How can we help you?

Fixed / Flex energy
procurement

Water
management

Climate change
levy rebates

Renewable energy
solutions

Meter Operator
Agreements

Compliance
reporting

Siteworks

Consumption
monitoring

What you should be considering?

Government EBRs

Did you know that fixed-rate contracts alongside the EBRs discount can save you money?

Check your standing charge

Standing charges have increased – always check these costs, not just the unit rates.

Explore cost savings

1 in 6 invoices contain errors. Check your bills are accurate and validate invoices.

Reduce consumption

Monitoring your energy consumption can allow you to reduce your usage and save money.

Could you generate your own energy?

It could be financially beneficial to generate your own electricity, plus repayment plans exist.

Why eyebright?
